

## Technology Update

*March 2011 Enhancements*

### QualBoard™

- ***Discussion Guides*** are now equipped with a message system that will assist moderators in separating guides once they reach 15 questions in a single section.
- Now in addition to Project Notes, we've ***added three new customizable fields*** that can be used to store any information a moderator desires. Examples include a participant ID from a panel provider, incentive amount, or an alternate email address.
- In addition to our existing Import function, we've ***built a new Export function*** that can export all participation stats, demographics, and the new custom fields into a spreadsheet.
- QualBoard™ is now compatible with the latest editions of ***Internet Explorer® 9 and FireFox® 4.***
- We've ***increased the speed*** that backroom notes and the discussion view populate for Internet Explorer® users.
